BK-700 signals detected at missile launch. Image credit: ANEK, oblast border guards, Ministry of Internal Affairs RKK, PhotoBastion BY February 3, 2004, the missile Sukhoi Design Bureau, later Kvadrat, had already successfully completed the qualification stage for the creation of a new generation of NATO-compatible anti-aircraft weapons and defensive equipment. This missile Sukhoi named the BK stands for "bayraktaryaktus" (the military form of Bayraktar). The missile will be designed for large-scale formations. The BK is the first anti-aircraft complex in the world equipped with an extended"aperture" (antiaircraft useles experience). It also has been reported that the BK is intended to arm the current-generation KV1 and KV2 missile systems. The new missile will be equipped with an effective "kill guidance system". In addition, the missile will have a range of up to 60 km. In order to increase the hit probability it will be equipped with an effective "kill guidance system". In addition, the missile will have an integrated electron counter-counter-assument part of the system is also planned to be installed on the BK-700 anti-aircraft missile platform. BK-700 platform The platform is based on the BK-700 combat vehicle design used by the missile platforms. A hydraulic crane is used for the loading and unloading of missiles. The vehicle can
